# TRAFFIC BOT

🕰️ Quick Start Guide 🕰️

Welcome to AI Buyer Traffic Bot.

This short and sweet guide will get you setup with the AI in minutes!

🔥🔥 *You made a smart choice - now let's get going, in seconds* 👇

1. Accessing Everything - Members Area

To visit the **Traffic Bot members area,** log in to your WarriorPlus account - and click your **username** in the red + click "**purchase history**":

There you will find all the recent purchases you made on Warrior - including links to all the members pages.

2. Getting Started With The Software

You will be able to access all the software tools. **To access Traffic Bot, simply create an account. Be sure to use the email address you purchased with on W+.**

To build the recommended website for Traffic Bot, use our WordPress theme (if you do not want to setup WordPress, or do not have a domain/hosting, you can simply use our [DFY website setup service here](#)).

3. Getting Updates (To Traffic Bot)

AI is constantly changing (rumors are already swirling of a GPT5 release!). I do regular updates to the core AI tools, free training videos on AI updates, and also webinars with new training and tactics.

To ensure you get access to all this, hit reply to my "welcome email". I will send you a bonus AND it will ensure my email is whitelisted.

4. REQUIRED To Use Traffic Bot

Traffic Bot is a software that uses a complex sequence of tools to give Chat-GPT access to Google search (to then create better content than is currently ranking). We use our own accounts and software to handle most queries, but there are two specific accounts you will need to create to use the software:

A) CONNECT TO CHAT-GPT
Traffic Bot connects to Chat-GPT, an AI that is owned by OpenAI. You will need an "API key" to use the tool. Therefore, if you don't already have an account with OpenAI, you will need to do the following:

1. Create an account with them https://platform.openai.com/account/api-keys
2. Get an API key - https://platform.openai.com/account/api-keys
3. Insert the API key into the settings page of Traffic Bot and hit save
4. Then you have connected Traffic Bot to the AI. Done.

Once you have completed this step, your copy of Chat-GPT is now connected to all of the top niches and keywords on Google! There's nothing else to do.

B) CONNECT TO SERP-API
Traffic Bot connects to Google search, using a service called SerpAPI. This is free for 100 searches per month, which should be more than sufficient for 99% of users. This is a very powerful service, used by companies like IBM, AirBnB, Shopify & Harvard.
If you don't already have an account with Serp-API, you will need to do the following:

1. Create an account with them https://serpapi.com/
2. Get an API key - https://serpapi.com/manage-api-key
3. Insert the API key into the settings page of Traffic Bot and hit save
4. Then you have connected Traffic Bot to Web Search. Done.

Once you have completed these stacks, your copy of Chat-GPT is now connected to its own search engine and web browser! There's nothing else to do.

5. My "AI Tech Stack" - January 2024

OK here is my AI tech stack for March 2024, in the rough order which I use them:

1. **AgentX - TBC - <mark>*PUBLIC LAUNCHING 2024*</mark>**
   I began working on my AI agent as soon as GPT-4 launched in March 2023, and started automating my entire business pretty much immediately. By November 30th (the 1 year anniversary of Chat-GPT's launch), the Agent fully automated over 25 of my key marketing tasks. Today it automates over 40. It's difficult for me to put into words what a *step change* AI Agents are in 2024. So be sure to register for my webinar on Agents to find out. We're opening up once in March, then closing and reopening sometime later in 2024. I recommend you watch the webinar and jump on this while it's here. AGENTS that MAKE MONEY is something you want to be EARLY on!

2. **ChatGPT Plus - https://chat.openai.com/chat <mark>*UPDATED*</mark>**
   I use this for a near-infinite range of purposes such as creating software, writing sales copy, and doing technical research. If you have $20/month I would **definitely** upgrade to "Chat-GPT Plus" (click on "your account" on the left) as it gives you access to GPT-4 which is the most powerful model **AND** now also gives you GPT Plugins, Bing Browser - **AND** now Dalle-3 **AND** Multi-Modal too! Yes! Multi modal = GPT now has vision included so you can even upload an image and ask GPT about it. Their iOS app now has voice-chat, and well.. It's difficult to overstate how impactful GPT-4 was to my business in 2023, and in 2024 it's continuing to be more of the same.

3. **RemixableAI - http://remixable.ai/ <mark>*UPDATED*</mark>**
   My own software suite, just crossed $300k in dev costs and basically automates every aspect of running a digital product business (either as an affiliate, Youtuber, list builder or product owner). This now has Chat-GPT fully integrated into the tool (for copywriting) along with 40+ training videos on AI. If you want to sell your own product this is indispensable (and now integrates with Agent X).

4. **Dalle 3- https://www.bing.com/images/create (AND now inside Chat GPT Plus!) <mark>*UPDATED*</mark>**
   Let's rewind all the way back to the summer of 2022:, Chat GPT was still six months away. But OpenAI's first big viral splash was "DallE", their image generation tool. Then came Dalle-2, - and then in September 2023, Dalle-3 dropped, initially via Bing (login to your Microsoft account and hit the above link). So.. is DallE better than MidJourney? In some ways.. Yes. It's not as good as MJ at photorealistic "stock" type shots (where MJ v6) shines, but it's

generally much more reliable for marketer-centric tasks like vectors or ecovers (try prompt like "software ecover box with text "YOUR-PRODUCT" with robot icon"). It is also VERY good at turning weird text prompts into pics (since it is powered by Chat-GPT). GPT Plus has DALLE-3 inside its account now, so if you have a GPT Plus account (you should!) then you now have the #1 language AI AND the #1 image AI in one...

5. **Pika https://pika.art/ + runnerup https://runwayml.com/ *UPDATED***
Up until December 2023, the #1 video generation AI was Runway but all that changed with the beta public rollout of "Pika v1". Simply upload any image or text prompt and begin generating AI videos. I like to make an image with Dalle3/Leonardo/MidJourney, import it into Pika, upscale it - and then remove the watermark with Runway cleanup/editing/inpainting. Very cool. Note that Pika and Runway are still far from perfect (AI video isn't quite on the level of language or images), but we are getting there. And Pika is after all free! NOTE: In Feb 2024, OpenAI announced their "Sora" video generation AI which blows all other tools out of the water, but an official announcement date is... *pending*. I suspect we are months away from Sora dropping (post US-elections due to deep-fake-fears?), but when it drops.. video is done. Stability Video is also here (see #7) but isn't directly available on the website.. yet.

6. **ElevenLabs - https://beta.elevenlabs.io/voice-lab**
The best AI voice generation tool right now. Clone voices, create voices from scratch. All my videos are made with 11L, and all the agent tasks use their tech, as it's simply the best one bar none. Powers all my videos and my agents.

7. **ClipDrop + StableDiffusionXL https://clipdrop.co/image-upscaler**
The simplest place to access Stable Diffusions's "XL" model (text to image which is now close to MidJourney, although still a step behind). Also, though, Clipdrop has a whole suite of VERY useful AI image tools such as cleanup, text remover, remove background, image upscaler and more. Very often I'll get an image in MidJourney I love but it has text and a background I don't like - and MJ exports at 1024x1024. I will import into Clipdrop, remove the background, remove the text and then upscale the quality to 2000x2000. FYI, Clipdrop is now (bizarrely) owned by the copywriting AI company "Jasper", with Stable's main site being https://stability.ai/ - expect more from them there as they push new models (but Clipdrop remains free and the simplest site for 99% of users).

8. **Canva AI + Magic - https://www.canva.com/ *UPDATED***
Announced a whole suite of AI tools in a big "create" event last summer, and then in October 2023, integrated some more "photoshop-like" features (generative extend, animations, RunWay ML integration). VERY powerful when combined with MidJourney (create in MJ, edit in Canva AI). Their "AI Image

Editor" is exceptionally good and provides the 2nd best inpainting after Photoshop. Simply import an image, click "edit image", choose the AI editor and then enter a command (eg "put glasses on robot"). AI feature only available with their pro plan ($10 month) and it only allows 100 edits per day. Trust me, I found out the hard way! CanvaAI has now dropped a space (owing to Photoshop AI), but CanvaAI's inpainting is still very good - just not on the insane level of Photoshop (plus its ⅓ the price of PS!). Canva is also 100x easier to use than Photoshop and so has now risen a space in my top 10 as a "newbie to intermediate user's better alternative to Photoshop". I am impressed at the Canva team's obsession with product iteration, especially vis-a-vis AI!

9. **Adobe PhotoShop AI - https://www.adobe.com/uk/products/photoshop/generative-fill.html** With the release of Photoshop AI (and specifically its "generative fill" feature). Simply highlight an area & type ("red hair"), and watch as the AI spits out three variation images. It's also very powerful at extending an image. eg. take an AI image you made with MidJourney (or any stock photo), let's say of a basketball-playing robot - then extend your image with an empty space either-side and type "basketball playing robots", and watch as the AI extends your 1:1 image into a 3:1 masterpiece. Only downside? It's $30/month. But.. it does come with a trial. If you do any image editing though, this is an instantaneous must-have. It launched right in at #4 as soon as it went live, but has now been pushed down by MidJourney introducing a "zoom" feature with version 5.2 in late June. Note: if you work with "AI images", like me, I recommend the AI tools here. But if you work with a lot of "real photo graphics" then Photoshop is great. I also do a lot of editing in Photoshop (ie make an image in DallE or MJ then update it).

10. **MidJourney - https://www.midjourney.com/ <mark>*UPDATED*</mark>** The top AI graphics tool (and my overall #2) at the start of 2023, but now dropping places. With DallE (inside the agent) I barely bother with MidJourney at all, despite them pushing some strong updates. To be fair MJ v6 is very powerful and does now let you create celebrities and copyrighted images. AND it is now also very good at text generation (although not as good at ecovers and other typical use cases for images). PS. If MJ/DallE is pushing you away from spending extra $$ on multiple AI image tools, then some extra honorable mentions - https://www.bluewillow.ai/ which isn't quite as good as MidJourney but works very similar, uses the same prompting system and has one big benefit - it's free! Leonardo AI is also excellent (https://leonardo.ai/) with some very very nice presets, the ability to train your own image model with as little as 10x prompts and video too! MidJourney has a web app for

those with 1,000+ images made, and I suspect will be 100% web based soon.

7. Getting The Best From AI In 2024

There are a number of AI tools that I use (well, I use them all!) But the two in particular I recommend are Chat-GPT and MidJourney. Also… Photoshop (image editing is vital for designers and image editors & ElevenLabs for content/sales videos (for voice). Plus,, LeonardoAI (images), PlaygroundAI (images), BlueWillow (images) & ElevenLabs have **free** plans. If you're on a budget, here are my recommendations…

SOMEWHAT LIMITED BUDGETS...
👉 *"I have no money at all"* - get Chat-GPT and use Bing Chat. If…
👉👉 *"I can only afford $20/month"* - get Chat-GPT Plus and get BlueWillow or StableDiffusion/Clipdrop instead of MidJourney
👉👉👉 *"I can only afford $30/month"* - get Chat-GPT Plus + MidJourney basic plan

SERIOUS ABOUT MONEY MAKING...
💪🤖👉 *"I am serious about AI, and want the best"* 👉 first get Chat-GPT Plus. Then get Remixable AI (see below). Next, get MidJourney. Next, get either Adobe Photoshop AI or Canva Pro (to access the AI inpainting and editing of images). FInally, consider Runway ML or Kaiber AI for video. Use all these tools & stay subscribed - I'm hearing of big updates later this summer! ☀️☀️

8. Final Thoughts

Be sure to register for my **AI Agents** training session

AI agents are ALL that 2024 is going to be about, and my own Agent has transformed how I make money and run my business.. and it's just getting started!

- Register the webinar "[How I BAG💰 $15 Per Second ! - With 6,500x MONEY-MAKING 🤖 A.I BOTS](#)" – this Tuesday 26th March.

- Check out your email just before 2PM EST Tuesday to claim your place!

OK, keep your eye on your email. Big updates dropping - March 2024 & beyond!

Thanks, Chris
P.S. Agent X ;-) Watch out…
